INTRO

A professional and talented Front-End Developer proficient with React and several web frameworks. A first class graduate of Mathematics, University of Ilorin, Nigeria.

WORK HISTORY

February 2023
Personal Project

React Poster App
Frameworks: React, Bulma CSS

- I built the entire UI structure using React and Bulma CSS
- Implemented persistence using the browser local storage API

June. 2024

News Aggregator App - Full Stack Project
Frameworks: React, Next.js, CSS Modules, SQL

- Designed and developed a minimalist, responsive news aggregator platform for delivering real-time news updates across various categories.
- Integrated advanced news filtering functionalities by category, source, and recency for an enhanced user experience.
- Implemented a clean and intuitive user interface for seamless navigation and enjoyable browsing.
- Utilized Next.js features for improved performance, including server-side rendering and dynamic routing.
- Built a robust backend with SQL for efficient and secure data storage and retrieval.
- Designed optimized database schemas to manage news articles, categories, and user preferences effectively.
- Implemented server-side logic for real-time query execution and rapid data delivery.
- Ensured responsive design compatibility across devices to maximize accessibility for all users.

September 2022
Personal Project

E-commerce Product Page.
Frameworks: React, CSS Modules, SQL

- Designed and developed an engaging, responsive product page tailored for e-commerce platforms to showcase individual products effectively.
- Integrated an interactive user interface for viewing detailed product information, including images, specifications, and pricing.
- Implemented advanced filtering and sorting functionalities to enhance product discoverability by category, price range, and user preferences.
- Built a robust backend using SQL for efficient management of product inventories, user accounts, and order data.
- Designed scalable database schemas to handle large datasets and dynamic updates to product catalogs.
- Utilized React components to ensure modularity and maintainability of the front-end interface.
- Ensured seamless compatibility across devices by leveraging responsive design principles.
- Focused on delivering a fast and reliable user experience to boost customer engagement and conversions.

September 2024
Personal Project

Food Ordering App
Frameworks: Next.js, CSS Modules, SQL

- Designed and developed a sleek, responsive food ordering application to enhance the dining experience for users.
- Implemented intuitive navigation and a user-friendly interface for seamless food browsing and ordering.
- Integrated advanced search and filtering functionalities to help users locate dishes by cuisine, dietary preferences, or price range.
- Built a secure and efficient backend using SQL for managing user data, menu items, and order transactions.
- Designed optimized database schemas to handle complex relationships between menus, orders, and user preferences.
- Utilized Next.js features like server-side rendering and API routes to enhance application performance and interactivity.
- Ensured responsive design for compatibility across various devices, including mobile, tablet, and desktop.

PROJECTS

2023

React Poster App
Github - React-poster-App

Easy poster creation, customization, and interactive features for dynamic display.

2024

News Aggregator App
See - News Aggregator App

A real-time news fetching, categorization, and personalized content for easy access to the latest updates.

2022

E-commerce Product Page
See E-commerce App

A product display, detailed descriptions, and seamless purchase **options** for a smooth shopping experience.

2024

Food Ordering App
See - Food Ordering App

An easy menu browsing, customizable orders, and secure payment options for a convenient dining experience.

2023

React To-do App
GitHub React Todo App

A task creation, easy prioritization, and seamless task management for efficient organization

TECHNICAL SKILLS

HTML

Javascript

React

Typescript

Bulma CSS

Git & GitHub

NodeJS

ANGULAR

Vue.JS

NextJs

CERTIFICATES

Meta Frontend & Backend Development

Track: Frontend, Backend

Web Development with Next.Js (Udemy)

Track: Full-Stack Web Development using Next.js, with features like NextAuth and TailwindCSS

EDUCATION

Oct. 2019 – Aug. 2024

B.Sc Mathematics (First Class Hon)

University of Ilorin, Nigeria.
